TECHNICAL EXPERIENCE

Frontend Developer — DrawLead Technologies

Sep 2023

Chennai, TN

- Implemented and optimized dynamic web solutions using WordPress, HTML, CSS, and JavaScript. Contributed actively to diverse projects, enhancing user interfaces and optimizing user experiences.

Apprenticeship — AccioJob

May 2022 - Nov 2023

- Collaborated with friends on various course projects. Assisted team members in understanding logical approaches to achieve project goals creatively and efficiently - [Certificate](#)

PROJECTS

PERSONAL FINANCE TRACKER

Developed a web-based financial management tool for individuals to track monthly expenses, earnings, and budget planning while visualizing spending patterns using interactive charts.

Engineered Firebase as an authentication service, enabling secure user sign-up and login with options such as Google or email/password authentication.

Implemented an import/export feature for efficient data backup and analysis. Successfully deployed the application to a public domain using Netlify.

[\(Explore here\)](#)

MOVIE TICKET BOOKING PLATFORM

Developed a web-based movie ticket booking platform API allowing users to browse movies, book tickets, and manage their bookings. The platform includes features for user authentication, movie listings, seat selection, and payment processing.

Designed and implemented the backend using Spring Boot framework and MySQL database to handle user data, movie information, bookings, and transactions.

Implemented features for users to search for movies by genre, language, or release date, providing a personalized movie browsing experience.
